

ELEMENT KOREA

Trusted Global Testing Partner

Making Tomorrow Safer Than Today

Element Korea ensures that future-leading products and materials are safe, reliable and compliant with the highest standards.

We support a wide range of industries worldwide, providing testing, inspection and certification services dedicated to a safer tomorrow.

Our Core Values and Behavioral Guidelines

INTEGRITY

**We build trust.
We're accountable.**

Our foundations are built on trust and accountability.
We take pride in our work, and we keep our promises.

We're committed to deliver every time for
— our customers and for each other. —

CARE

**We collaborate.
We support each other**

Creating a safer world starts with us,
caring about each other and our customers.
Our culture is inclusive, and everyone is welcome.
We work together to create a stronger business,
making a positive difference to the world around us.

PROGRESS

**We bring energy.
We keep evolving.**

We stay curious to evolve and improve every day.
We grow and learn by constantly thinking about
our impact and how we can do better for each other,
society and the planet.

 **Acquisition count in 2023** **3**

 **NPS Score** **+65**

 **Employees** over **9,000**

 **Client** over **60k**

 **Revenue growth since 2011** **15x**

 **Employee Engagement Score** **75%**

OUR GROWTH

Business Areas

Five Key Services

Product Testing

Element Korea performs mechanical, environmental, and electrical tests to ensure product safety, performance, and regulatory compliance.

Inspection Service

Element Korea verifies materials, products, and systems meet specifications during production or construction, including NDT.

Certification Service

Element Korea certifies products and systems for compliance with industry standards in medical devices, construction, and automotive.

Advisory and Consulting Service

Element Korea offers expert consulting to ensure compliance, safety, and performance in aerospace, energy, and life sciences.

Calibration Service

Element Korea ensures accurate and efficient device operation through standardized calibration.

Global Certification

Element Korea supports global market entry by providing electrical safety, wireless, EMC, energy efficiency and hazardous substances testing services in over 200 countries.

CE Certification Service

Element Korea provides CE testing with EU-authorized partners.

China Certification Service

Element Korea offers CCC and CQC testing for electrical products to meet Chinese safety and quality standards.

EAC Certification Services

Element Korea offers EAC testing for export to five EAEU countries, including Russia and Kazakhstan.

Brazil Certification Services

Element Korea offers INMETRO and ANATEL certification through partner agencies for compliance with Brazilian regulations.

Japan Certification Services

Element Korea provides PSE testing and certification services for electrical and electronic products in Japan.

Taiwan Certification Services

BSMI: Safety and quality for electronics and consumer goods.
NCC: Telecom equipment and service certification.

Mexico NOM Mark

Mexico's official certification ensuring product and service safety, quality, and environmental impact.

North America Testing Service

Element Korea supports wireless and EMC testing and certification for electrical products in the U.S., Canada, and Latin America.

Canada NRCAN Energy Efficiency Certification

A program certifying products and systems with high energy efficiency, providing consumers with information to choose energy-efficient products.

U.S. UL Certification Mark

A safety mark certifying the safety and performance of electronics, consumer products, and industrial equipment.

Japan Certification for IT Equipment Emissions

Testing services supporting certification in the industrial sector.

India BIS Certification Mark

India's official product certification ensuring quality and safety of electronics, machinery, and consumer goods.

Australia Mandatory Certification

Testing and certification services for electrical and electronic products.

Singapore Safety Certification

Safety mark for household electrical, electronic, and gas appliance accessories.

South Africa SABS Certification Mark

South Africa's official certification ensuring products meet SABS quality and safety standards.

Element Yongin

Yeojik: EMC, lighting, energy efficiency, standby power

Unhak1: EMC, electrical safety, battery

Unhak2: EMC, RF, domestic and international certifications

Giheung: Food, livestock products, health functional foods, hazardous substances in the environment

Element Suwon

Suwon: RF, SAR

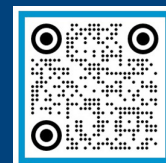

Element Dongtan

Dongtan: Battery testing, reliability (for batteries, automotive electronics, and defense applications)

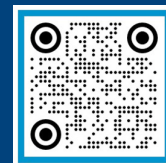

Sandan: Battery testing, reliability (for batteries, automotive electronics, and defense applications)

Namsa: Medium- and large-scale battery testing

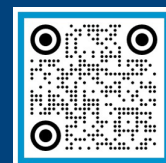

Daegu: Reliability (automotive electronics)
